Partners

The Grab

With an impressive line-up of world-class game industry executives and proven technologies in use by the Top 20 industry actors, Ultra's innovative PC games distribution platform aims to disrupt the game industry by offering new opportunities to game developers, players and influencers.

Problem / Opportunity

For developers:

- Major content discoverability issues
- Provides virtually no marketing tools or mechanisms
- Forces developers to hand over their customers and lose their control in the process
- Not suited for major MMO game publishers
- Revenue cut is prohibitive (~30% before tax)
- Does not share proper data to their developers
- No game publishing platform offers seamless game porting from Steam

For players:

• 51% Male
• 49% Female
~age 38

• 56% Casual gamers
• 24% Mid-core gamers
• 20% Hardcore gamers

- Doesn't offer any referral programs
- Doesn't reward players for contributions on the platform
- All side services such as betting, tournaments, etc. are on separate platforms
- Aging platform with bad UI/UX and no exciting new functionalities
- Doesn't cater properly to Chinese players

Solution / Product

Leveraging our existing game publishing technology and our extensive experience in the games industry, Ultra is solving industry problems with innovation.

- Large panel of free and commercial marketing tools for game developers
- Easy content porting from Steam, Xbox, PlayStation and Nintendo to Ultra
- Turn-key solution to successfully publish games in China
- Opt-in and configurable secondhand digital goods market
- Integrated user interface for game and virtual item tokenization
- Low revenue cut ~15%
- Multi-level referral mechanisms
- Our "we-economy" philosophy offers many revenue streams to all actors. We all succeed together.
- Developers retain control over their customers

Revenue Streams

- Game sales revenue shares
- Item trading revenue shares
- Advertisements
- Monthly content subscription plan revenue shares

Competitive Edge

- World-class team
- Exclusive partnerships in China (~70M users)
- ~8 patents in the application process
- Exclusivity on top technologies

At the corporate level, Ultra has experience, relationships and development expertise unlike any other gaming blockchain project and has a proven track record of building successful ventures.
